40 symbols available

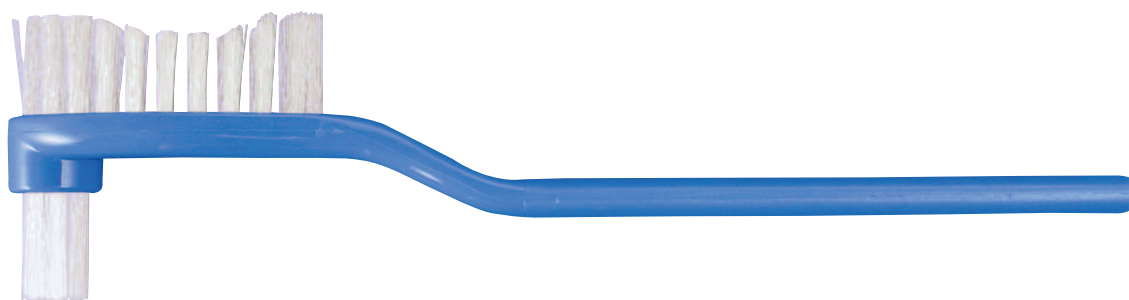

Supplement to the ordinary toothbrush

TANDEX SOLO brush

Designed for dental hygiene of the critical areas: along the margin of the gingiva, in large interdental spaces, molars, bridge works, teething etc.

TANDEX denture brush

A special brush with two brush heads to clean the dentures. The small brush head is to be used for that part of the denture which is in contact with the gingiva – the big brush head is for the outside of the denture.

CLASSIC and PROFF interdental brushes with plastic coated wire

All the TANDEX interdental brushes are made with a plastic coated wire. The interdental brush is used in large interdental spaces. It cleans effectively and is an important aid against dental diseases.

HANDY interdental brushes with medallion handle

The small size of the handle and brush ensure access to all areas, also those difficult to reach

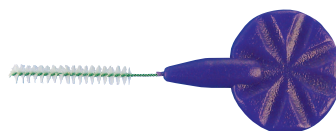

TANDEX has developed an anti-bacterial gel especially for interdental brushes. The gel is non-abrasive and contains chlorhexidine and fluoride. TANDEX GEL has been clinically tested together with the interdental brushes in cooperation with the Faculty of Odontology, University of Göteborg

Together with HANDY interdental brushes a protective plastic cover is provided

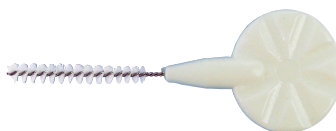

X-micro fine, yellow plastic handle
Brush diameter: 2.5 mm

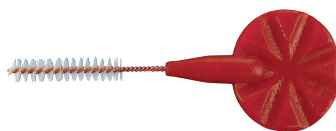

Micro fine, purple plastic handle
Brush diameter: 2.5 mm

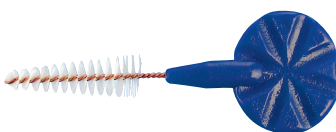

Ultra fine, green plastic handle
Brush diameter: 2.0 mm

Extra fine, white plastic handle
Brush diameter: 2.5 mm

Fine, red plastic handle
Brush diameter: 3.0 mm

Tapered fine, blue plastic handle
Brush diameter: 2.0 – 5.0 mm

FLEXI interdental brushes with flexible ellipse handle

TANDEX FLEXI is designed with an ergonomic user-friendly handle. The handle is flexible and makes it easy to reach all the interdental spaces from front to molars. The rubber handle ensure a good grip.

Micro fine, coral
Brush diameter: 2.0 mm

Fine, lemon
Brush diameter: 3.5 mm

Ultra fine, tangerine
Brush diameter: 2.0 mm

Extra fine tapered, lilac

Super fine, ruby
Brush diameter: 2.5 mm

Tapered, lime
Brush diameter: 3.0 – 6.0 mm

Extra fine, aqua
Brush diameter: 3.0 mm

FLEXI is delivered with a protective plastic cover
which also serves as handle prolongation

PROXI interdental brushes for metal handle

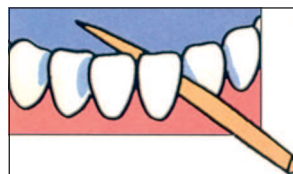

An original design from TANDEX. This product is used together with a metal handle and is interchangeable.

The unique PATENTED design secure the metal tip on the handle is fully covered to avoid scratches or other damages on the mouth and teeth.

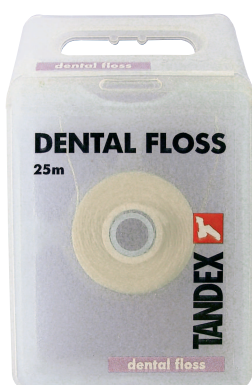

The colours of the plastic part identify the size. The colours and sizes are identical to the FLEXI interdental brushes, and thereby offer a unique tool for dentists in prescribing the correct interdental size.

TANDEX accessories

TANDEX dental toothpicks are made of fibrous wood or plastic and are triangular to fit the spaces between the teeth. They clean effectively without injuring teeth and gingiva. Protective against caries and dental diseases.

TANDEX dental tape and floss are both slightly waxed. Effective cleaning especially of the narrowest interdental spaces.

TANDEX A/S 

TANDEX A/S

TANDEX is a private owned Danish company which started the manufacture of dental products in 1930.

TANDEX produces and sells a full range of preventive dental care products including:

- toothbrushes
- interdental brushes
- interspace brushes
- denture brushes
- dental toothpicks
